Index to Volume 10 ■ 2003

This index covers JAMIA issues for 2003 as follows: Jan–Feb, pages 1–114; Mar–Apr, pages 115–228; May–Jun, pages 229–294; Jul–Aug, pages 295–398; Sep–Oct, pages 399–514; and Nov–Dec, pages 515–632.

SUBJECTS

A

Abstract PRO*forma* Engine, 438-439, 439f

ACTION project, 504-511, 509t, 510t
- age- and disability-related design implications in, 506
- content of, 506-507
- current status of, 510
- design and implementation of, 504-506
- discussion of, 510
- exploratory needs assessment in, 504
- supporting hardware and software, 506
- trials with, 507-509
- usability evaluation of, 509, 509t, 510t
- USERfit methodology in, 506

ADEs. *See* Adverse drug events (ADEs)

Adverse drug events (ADEs)
- information technology in detection of
  - in inpatients, 124-125
  - in outpatients, 125
- reduced, simulation of, inflated impacts of medication use technology in, 290-291

Adverse event concepts, trigger words in, 342t-343t

Adverse events detection (AEDs), information technology in, 226-228
- future work in, 227
- policy issues related to, 227

Adverse medical events, electronically screening discharge summaries for, 339-350, 342t-343t, 344f, 345f, 346t, 347t. *See also* Electronically screening discharge summaries, for adverse medical events

Africa, sub-Saharan, computer-based patient record system in, implementation of, 295-303, 297f-299f, 301t, 302t. *See also* Mosoriot Medical Record System, implementation of

Agency for Healthcare Research and Quality (AHRQ), 531

AHRQ, 531

Anthrax, inhalational, mediastinal findings associated with, automatic detection of chest radiograph reports consistent with, creation of text classifier for, 494-503, 495f, 496f, 498f-500f, 499t, 501t. *See also* Inhalational anthrax

Antiretroviral adherence, enhancement of, two-way messaging system in, 11-15
- equipment for, 12-13
- maintenance of, 14
- messages in, 13
- methods in, 12-13
- observation in, 13-14
- participant enrollment in, 12
- participant training in, 12
- setting of, 12

Applied Strategies for Improving Patient Safety (ASIPS), 531

Arden Syntax, 53

AR-DRG system, DRG grouping according to, 467-468

Asbru, 53

ASIPS. *See* Applied Strategies for Improving Patient Safety (ASIPS)

AsthmaCritic, 419-424, 420f, 421f, 422t
- described, 419-421, 420f
- design choices for, 421-422, 422t
- discussion of, 422-423
- implementation of, 421, 421f

Automated syndromic surveillance, for 2002 Winter Olympics, 547-554, 552t. *See also* 2002 Winter Olympics, automated syndromic surveillance for

Automating complex guidelines
- for chronic disease, 154-165, 157f-161f. *See also* Chronic disease, automating complex guidelines for
- of National Guideline Clearinghouse, 154

B

Bioinformatics
- education and training in, 520
- informatics goals of, 516, 518
- medical informatics and
  - collaborations between, 515-522, 517t, 521f
    - for genomic medicine, 516-520, 517t, 521f
      - data and knowledge integration in, 518-519
      - data quality and analysis in, 518
      - patient continuing education related to, 519
      - professional continuing education related to, 519
      - tools for research and practice in, 519
  - relationship between, 515-516
- scientific goals of, 516, 518
- strategy in, development of, 520

Biomedical informatics manuscripts, reviewers of, criteria for, development and evaluation of, 512-514

Biosciences, data management in, RDBMSs in, 444-453, 447f, 448f

Business management, PDAs in, 145-146

C

CACs. *See* Clinical Application Coordinators (CACs)

Cancer patients, symptom management in, shared decision making in, computerized system effects on, 573-579, 575f, 576t, 577t, 578f

Index to Volume 10 ■ 2003

This index covers JAMIA issues for 2003 as follows: Jan–Feb, pages 1–114; Mar–Apr, pages 115–228; May–Jun, pages 229–294; Jul–Aug, pages 295–398; Sep–Oct, pages 399–514; and Nov–Dec, pages 515–632.

SUBJECTS

A

Abstract PRO*forma* Engine, 438-439, 439f

ACTION project, 504-511, 509t, 510t
- age- and disability-related design implications in, 506
- content of, 506-507
- current status of, 510

Biosciences, data management in, RDBMSs in, 444-453, 447f, 448f

Business management, PDAs in, 145-146

C

CACs. *See* Clinical Application Coordinators (CACs)

Cancer patients, symptom management in, shared decision making in, computerized system effects on, 573-579, 575f, 576t, 577t, 578f

CHOICEs in, 574
study design considerations in, 575
study discussion in, 577-578
study instrumentation in, 575-576
study limitations, 578-579
study measurement of variables, 575-576
study methods in, 574-576, 575f
study procedures, 574-575
study results in, 576-577, 576t, 577t
Cardiac diagnostic program, in clinical setting, evaluation of, 373-381, 374f-376f, 377t-379t, 378f. *See also* Heart Disease Program (HDP), evaluation of
Cardiology, PDAs in, 147
Care, primary. *See* Primary care
Caregiver(s), multimedia software for, 504-511, 509t, 510t
CDSTC. *See* HL7 Clinical Decision Support Technical Committee (CDSTC)
Charmed device, 170
Charting deficiencies, in ICU, computer-generated reminders effects on, 177-187, 179t, 180f, 181t, 183t, 184f. *See also* Intensive care unit (ICU), charting deficiencies in, computer-generated reminders effects on
Children
diarrhea in, over-the-counter electrolyte products and, 555-562, 558t, 559t, 561f. *See also* Electrolyte products, over-the-counter
respiratory problems in, over-the-counter electrolyte products and, 555-562, 558t, 559t, 560f, 561f. *See also* Electrolyte products, over-the-counter
CHOICEs, 574
Chronic disease, automating complex guidelines for, 154-165, 157f-161f
described, 155
design objectives, 156
discussion of, 160-163
guideline authoring in, 156-157, 158f, 159f, 162
guideline content in, 156, 161-162
guideline execution in, 157, 158f, 162
guideline representation in, 156, 157f, 162
guideline selection in, 156, 160-161
setting of, 155-156
status report of, 158-159, 160f
system description in, 156-158, 157f-160f
workflow in, 157-158, 160f, 162-163
Clinical Application Coordinators (CACs), 325
Clinical care, computers for, advanced U.S. sites study, 94-107, 96, 97f, 98t-100f, 101f, 102t, 104t. *See also* Computer(s), for clinical care, advanced U.S. sites study
Clinical computerization, in Hong Kong, incentives and barriers influencing. *See also* Hong Kong, clinical computerization in, incentives and barriers influencing
population-based physician survey of, 201-212, 203t, 205t, 206f, 207t-209t
Clinical Data Warehouse Initiative, 23
Clinical databases
historical background of, 22
relational and textual data in, integrating query of, case study, 21-38, 26t, 28f, 30t, 31t, 32f, 33f, 36f
comparative benchmarking of MS SQL server and dtSearch in, 29-31, 30t, 31t
comparative evaluation of IR/RDBMs software in, 24-29, 26t, 28f
considerations posed by, 35-37, 36f
limitations of, 34-35
motivation for, 22-23
present status of, 34-35
system description in, 31-34, 32f, 33f
system implementation in, 31-34, 32f, 33f
system objectives in, 23-24
Clinical decision making, diagnostic decision support effects on, measurement of, 563-572, 565f-567f, 568t, 569f, 570f. *See also* Diagnostic decision support, impact on quality of clinical decision making, measurement of
Clinical decision support, effective
study site, 524
ten commandments for, 523-530, 524f-527f
anticipate needs and deliver in real time, 524-525, 524f, 525f
ask for additional information only when you really need it, 527-528
changing direction is easier than stopping, 526-527, 527f
discussion of, 528-529
fit into user's workflow, 525
limitations of, 529
little things make a difference, 525
manage and maintain your knowledge-based systems, 528
monitor impact, get feedback, and respond, 528
recognize that physicians will strongly resist stopping, 525-526, 526f
simple interventions work best, 527
speed, 524
Clinical Laboratory Improvement Amendments, 2-3
Clinical patient record systems (CPRSs), historical background of, 22
Clinical radiology reports, XML-structured, concept-based representation in, precision of, contextual UMLS indexing to improve. *See also* Contextual UMLS indexing
Coastal North Carolina Domestic Preparedness Training Exercise, 166-176, 169f, 170f, 172f, 173t
Collection(s), defined, 22
Communication
patient–physician, Web messaging in, study of, 260-270, 262t, 263f-267f, 268t, 269t. *See also* Web messaging, in patient–physician communication, study of
satellite "reach-back," 169-170
Computer(s)
for clinical care, advanced U.S. sites study, 94-107, 96, 97f, 98t-100f, 101f, 102t, 104t
approach to computerization in, 96-97
clinical information systems in use in, 97-100, 98t-100t, 101f
impact of, 100-103, 102t
data analysis in, 96
data collection in, 95-96
discussion of, 105-106
implementation of, organization factors associated with, 103-105, 104t

methods in, 95-96, 96t
results of, 96-105, 97f, 98t-100f, 101f, 102t, 104t
site selection in, 95, 96t
handheld, in medicine, 139-149, 141t-143t
Computer interpretation, of EKGs, as source of interpretation error, 478-483, 479t-482t. *See also* Electrocardiogram(s) (EKGs), computer interpretation of, as source of interpretation error
Computer-based nursing documentation, user acceptance of, study of, 69-84, 72t-75t, 76f-78f, 79t, 80t, 81f
course of, 74-75, 75t, 76f-78f
data analysis in, 73
design of, 72, 72t
discussion of, 82-83
environment of, 73-74, 73t, 74t
intervention in, 71-72
measurements in, 72
methods in, 71-75, 72t-75f, 76f-78f
research questions in, 71
results of, 75-81, 79t, 80t, 81f
Computer-based patient record system, in sub-Saharan Africa, implementation of, 295-303, 297f-299f, 301t, 302t. *See also* Mosoriot Medical Record System, implementation of
Computer-generated reminders, effects on charting deficiencies in ICU, 177-187, 179t, 180f, 181t, 183t, 184f. *See also* Intensive care unit (ICU), charting deficiencies in, computer-generated reminders' effects on
Computer-interpretable guidelines models, comparison of, case-study approach to, 52-68, 56f, 57t, 58f, 59t, 60f, 61t, 62f-64f
analysis in, 54-55
background of, 53-54
decision models in, 59-60, 60f, 61t
differences in, 66
dimensions of comparison in, 54
discussion of, 65-67
expression/criterion languages used to specify decision criteria in, 60-62, 64f
limitations of, 66-67
methods in, 54-55
model of guideline actions in, 57-58, 58f, 59t
representation of medical concept model in, 62f, 64
research question in, 54
results of, 55-65, 56f, 57t, 58f, 59t, 60f, 61t, 62f-64f
selection of models in, 54
specification of goals/intentions in, 56-57, 58f
Computerization, clinical, in Hong Kong, incentives and barriers influencing. *See also* Hong Kong, clinical computerization in, incentives and barriers influencing
population-based physician survey of, 201-212, 203t, 205t, 206f, 207t-209t
Computerized provider order entry (CPOE) system, 322-329, 323t, 324f, 326f, 327t
consensus statement on considerations for successful conference on, 229-234
activities of, 230
conference goals, 229-230
discussion of, 233-234
issues faced by, 231-233
methods in, 229-230
postconference activities, 230
preconference activities, 230
results of, 230-233
conference on data from, 230-231
described, 322-323
study of
content for, gathering and implementation of, 324-325
data used in, 325
discussion of, 327-328
historical background of, 323
lessons learned from, 328-329
materials in, 323-325, 324f
methods in, 323-325, 324f
order configuration entities in
change in, 326f, 327
distribution of, by service, 327, 327t
frequency of use of, 326, 327t
number of, 325-326
results of, 325-327, 326f, 327t
software in, configuration of, 323-324, 323f, 324f
Confidentiality
in automated syndromic surveillance for 2002 Winter Olympics, 550-552
patient-related, handheld computing in medicine and, 147-148
of PSRS data, threats to, 532-533
in Regenstrief Medical Records System, 394-395
Consultation(s), patient-centered vs. disease-centered, in primary care informatics, 308
Contextual UMLS indexing, in improving precision of concept-based representation in XML-structured clinical radiology reports, pilot study of, 580-587, 582f, 583f, 584t, 585f, 586t, 587t
discussion of, 586-587
research hypotheses and methods in, 581-584, 582f, 583f, 584t
results of, 584-586, 586t, 587t
Country-wide computer, community physicians alerted by, in improvement of potassium testing in patients on diuretics, 541-546, 542f-546f, 544t. *See also* Diuretic(s), potassium testing in patients on, improvement of
CPOE system. *See* Computerized provider order entry (CPOE) system
CPRSs. *See* Clinical patient record systems (CPRSs)
Critical care, management of, PDAs in, 147
"Crossing the Quality Chasm," 2

D

Database(s), clinical, relational and textual data in, integrating query of, case study, 21-38, 26t, 28f, 30t, 31t, 32f, 33f, 36f. *See also* Clinical databases
Decentralized Hospital Computer Program (DHCP), 22-23
Decision-making process, in primary care, deductive reasoning vs. heuristic reasoning in, 306-307, 307t
Deductive reasoning, vs. heuristic reasoning, in decision-making process in primary care, 306-307, 307t
DHCP. *See* Decentralized Hospital Computer Program (DHCP)
Diagnosis-related groups (DRGs), grouping of, according to AR-DRG system, 467-468

Diagnostic decision support, impact on quality of clinical decision making, measurement of, 563-572, 565f-567f, 568t, 569f, 570f
study of
aims of, 564
discussion of, 568-571
factors contributing to plan quality in, 565
methods in, 565-568, 565f-567f
reliability and validity analysis of scoring system in, 567-568
reliability in, 568
results of, 568, 569f, 570f
scoring procedure in, 565-567, 565f-567f
validity in, 568, 569f, 570f
Diagnostic decision support systems, 608-610
amount of use of CDSS, 609-610
correct diagnosis in, 608-609
management suggestions in, 609
quality of differential in, 608-609
user acceptance/satisfaction in, 609
Diarrhea, in children, over-the-counter electrolyte products and, 56-f, 555-562, 558t, 559t, 561f. *See also* Electrolyte products, over-the-counter
DICOM structured reporting standard, XML schema representation of, 213-223, 216f-219f, 217t
described, 213-214
features of, 214, 215f
framework for generation of, 215-216
future work related to, 219-220
generated schema for numeric measurement macro, 222-223
generated top-level schema, 220-221
limitations of, 214-215
representation of numeric measurement macro, 221-222
root element and namespaces in, 217-219, 217f-219f, 217t
type for measured value sequence elements, 223
validation of, 219
Digital Imaging and Communications in Medicine (DICOM) Structured Reporting (SR) standard, XML schema representation of, 213-223, 216f-219f, 217t. *See also* DICOM structured reporting standard, XML schema representation of
Disease-centered consultations, vs. patient-centered consultations, in primary care informatics, 308
Diuretic(s)
adverse drug events with, 541-542
potassium testing in patients on, improvement of, country-wide computer alerts community physicians in, 541-546, 542f-546f, 544t
background of, 541-542
design objectives in, 542
discussion of, 544-546
existing system in, 542
organizational information in, 541
postintervention changes, 543-544, 544t, 545f, 546f
prevention of adverse drug events in, 541
system description in, 542-543, 542f-544f
Document(s), defined, 22
Document frequency index, defined, 22
DRGs. *See* Diagnosis-related groups (DRGs)
dtSearch, 29-31, 30t, 31t

E
